

Alexy Kotliar

Engineering Manager · AI-Native Delivery Leader

Vancouver, BC | 647 642 0105 | kotliar.alex@gmail.com | linkedin.com/in/alexey-kotliar | github.com/AlexyKotliar | alexkotliar.com

PROFESSIONAL SUMMARY

Hands-on Engineering Manager and AI-native delivery leader with 15+ years in software and 4+ years leading cross-functional engineering teams that build web, mobile, and cloud-based platforms. At TELUS, leads a large-scale microservices platform spanning React, React Native, Node.js, Java, and Python on AWS — now as AI-Native Tech Lead, embedding AI tooling and automation across the engineering lifecycle. Strong in platform ownership — driving production support, monitoring, service reliability, and operational excellence — while mentoring engineers, enforcing code-review and quality standards, and managing stakeholders across functions and time zones. Drove automation that reduced manual work by over 80%. Committed to engineering best practices, continuous improvement, and delivering exceptional guest- and staff-facing product experiences.

CORE COMPETENCIES

AI & Automation	AI-native delivery, AI agents & MCP, Claude Code, AI-assisted development & automation	Leadership	Team leadership & mentoring, hiring & onboarding, coaching, stakeholder management
Delivery	Agile / Scrum, roadmap execution, code reviews, sprint planning, Jira & GitHub	Platform & Ops	Production support, monitoring, service reliability, full-lifecycle ownership
Architecture	Microservices, micro-frontends, REST APIs, MVC, SPA, system integration	Languages	JavaScript, Node.js, Python, Java, PHP, SQL
Frameworks	React, React Native, Express, Spring Boot, Django, Flask, jQuery	Cloud & DevOps	AWS (EC2, S3) · Azure · Docker · Kubernetes · CI/CD · Git/GitHub
Data	MySQL, MongoDB, NoSQL, ORM	Testing	Jest, Cypress, JUnit, unit & integration testing

PROFESSIONAL EXPERIENCE

AI-Native Tech Lead — TELUS Health

Jun 2026 – Present

TELUS, Toronto, ON

- ▶ Transitioned on the same large-scale platform from Software Delivery Manager to **AI-Native Tech Lead**, setting technical direction for AI-driven engineering across the squads.
- ▶ Embed AI tooling and automation — including **Claude Code, AI agents, and MCP integrations** — across the development lifecycle to accelerate delivery and code quality while upholding reliability and review standards.

Software Delivery Manager — TELUS Health

Jan 2024 – Jun 2026

TELUS / TELUS Digital, Toronto, ON

- ▶ **Recruited from TELUS Digital into TELUS** in the same role to continue leading the same large-scale platform.
- ▶ Led **two cross-functional engineering squads** delivering a microservices-based platform across Java, Python, and Ruby, with customer-facing React and React Native applications on AWS (CI/CD, Docker, Kubernetes).
- ▶ Owned delivery roadmap execution — coordinated deployments, feature releases, and fixes; estimated effort and tracked progress and risk using Scrum.
- ▶ Drove operational health: managed resourcing to prevent delivery delays and acted as liaison between the engineering team and senior leadership.

- ▶ Mentored and developed engineers through feedback, coaching, and training; supported hiring by interviewing front- and back-end candidates.
- ▶ Built proofs of concept for new solutions and translated business requirements into technical delivery plans.

Senior Full-Stack Developer & Squad Lead
TELUS International Digital Solutions, Toronto, ON

Nov 2021 – Dec 2023

- ▶ Led an engineering squad building an internal portal on a **micro-frontend architecture** (React.js, Node.js, Jest).
- ▶ Established code-review standards and quality gates — catching defects pre-production and reducing technical debt.
- ▶ Planned and monitored sprints; created, assigned, and tracked tickets in Jira and GitHub against business timelines.
- ▶ Onboarded and trained developers; authored internal and external documentation.
- ▶ Optimized database queries, improving application response times and user experience.

Full-Stack Developer & IT Manager (Contract)
NVG Communication Inc. / TT Mercury Diamant

Feb 2020 – Nov 2021

- ▶ Delivered internal web platforms (company directory, knowledge base) using JavaScript, Node.js, Express, and Python.
- ▶ Owned the full lifecycle — design, development, deployment, and monitoring — with unit and integration testing and code reviews.
- ▶ Managed IT systems and support for a **300-user organization** across Linux and Windows Server environments.

Freelance Full-Stack Developer
Self-employed

Sep 2016 – Present

- ▶ Design and build B2C web applications, front and back end (Python, Node.js, JavaScript, HTML/CSS) on AWS EC2 and Heroku.
- ▶ Deliver client-facing features such as a web price-calculator service; ensure responsive, accessible UX across devices.

Manager — E-commerce & Internal Software
Wellcom Technologies, Holon

Jul 2010 – Aug 2016

- ▶ Led a team designing and maintaining an **e-commerce (osCommerce) platform** and internal tooling (PHP, JavaScript, MySQL).
- ▶ Built automation that **cut manual work by 80%+** and nearly eliminated human error in the sales process.

EDUCATION & CERTIFICATIONS

University of Toronto — Grad. Cert., Full-Stack Web Development	2021	Georgia Tech — Prof. Cert., Python Programming	2019
Harvard University — Prof. Cert., CS for Web Programming	2021	McMaster University — Advanced Java Development	Jan 2025
Harvard University — CS50 Web Prog. (Python & JavaScript)	2020	Thompson Rivers University — Computer Science	In progress

Certifications: AWS Certified Cloud Practitioner (2024) · Anthropic online courses (Claude / AI development) · Google Prompting Essentials · Google AI Essentials
